Karan Malhotra
karan.malhotra@example.com

Summary
Backend engineer focused on Python APIs, databases and cloud deployments.

Experience
Backend Engineer, Proseware Inc Jan 2021 - Present
- Built high-throughput REST APIs with FastAPI and Django serving 5,000 requests per second
- Designed PostgreSQL schemas and Redis caching layers, reducing p95 latency by 45%
- Containerised services with Docker and deployed them to Kubernetes on Google Cloud (GKE)
- Wrote automated tests with pytest and maintained CI/CD pipelines in GitLab CI
- Built Kafka consumers for event-driven microservices

Software Engineer, Alpine Ski House Jul 2019 - Dec 2020
- Developed internal tools with Flask and SQL, and scripted deployments with Bash on Linux

Projects
Personal project: deployed a scikit-learn model behind a FastAPI endpoint as a learning exercise

Skills
Python, FastAPI, Django, Flask, PostgreSQL, Redis, Docker, Kubernetes, GCP, Kafka, Git, Linux, SQL

Education
B.Tech in Computer Science, Eastern Technical University, 2019
